

WHAT IS BODY-JET WATER-ASSISTED LIPOSUCTION?

WAL liposuction is a method of removing fat using a water jet. Using water power instead of heat or vibration provides a safe and gentle way of separating fat from its surrounding tissue.

Made in Germany, the well-proven and reliable body-jet® uses the gentle power of water for body contouring. Body-jet® is the only WAL liposuction device on the market.

BENEFITS FOR PATIENTS

Can be done both under local or general anesthesia

Duration of the procedure is shorter

A faster recovery and return to normal life

Results are visible immediately

Significantly less bruising and swelling

Not damaging surrounding tissue

BODY-JET CAN BE USED FOR THE FOLLOWING PROCEDURES:

- Small-volume liposuction
- Large-volume liposuction
- Fat transfer

Treatment zones:

- Neck, chin, arms, abdomen, thighs, calves

LIPOELASTIC COMPRESSION GARMENTS

Compression therapy is an essential part of recovery after liposuction. Some surgeons believe that the right after-care can make up to 50% of the final results.

Wearing compression can help speed up the whole healing process and make it less painful.

LIPOELASTIC® COMPRESSION GARMENTS

- minimise swelling and bruising
- speed up the healing process
- reduces pain
- reduces the risk of infection
- forms contours
- minimises the creation of keloid scars
